

Checklist for Case Management for ServiceNow

1. **Gather Employee Background Information**
 - Determine Employment Type: Full-time, Contractor, or Intern.
 - Location Check: Identify where the employee is based.
 - Assess Query Context: Use the above details to better understand the nature of the inquiry.
2. **Assess the Query**
 - Review and Respond: Provide a clear, concise and detailed answer.
 - Prepare for Follow-Ups: Anticipate additional questions and provide relevant resources.
 - Resource Direction: Guide the employee to where they can find more information or who to contact.
3. **Clarify with Follow-Up Questions (if needed)**
 - Cross-Check Understanding: Ensure the employee's query is fully understood, especially if there are language barriers.
 - Ticket Topic Confirmation: Verify the main issue to provide accurate support.
4. **Update Case Details**
 - Complete All Fields: Include category, topic, subject person's details, request type, country, etc.
 - Avoid General Labels: Do not use 'General or Other' as these can hinder future analysis.
5. **Reassign the Ticket**
 - Document in Work Notes: Record your findings and share any useful insights.
 - Information Sharing: Ensure all relevant details are passed to the appropriate team.
6. **Utilize Knowledge Articles and Standard Templates**
 - Regularly review and update them as needed. Add new ones as you notice new patterns in queries. If you encounter outdated policies, coordinate with the relevant team to seek updates on the relevant web page.
7. **Ensure Content Accuracy**
 - Ensure the content is correct by reviewing intranet, HR page resources, documentation and standards and procedures. If you are unsure, cross-check with your team members.
8. **Closing the Case**
 - Write comprehensive Resolution Notes for complicated cases. If the case is reopened, document the reasons in the Work Notes.
9. **For more information**, please refer to additional resources, POC, help support if needed.
